

UP-STAIRS Digital Platform

Deliverable 4.7

Author(s) :	Henrik Schapp, GCN
-------------	--------------------

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 891775

Project details			
Project acronym	UP-STAIRS	Start (Duration)	1 September 2020 (36)
Topic	LC-SC3-EC-1-2018-2019-2020 The role of consumers in changing the market through informed decision and collective actions		
Call identifier	H2020-LC-SC3-EE-2019	Project Number	892037
Coordinator	University College Cork – National University of Ireland Cork (TYN)		
Contact person	Pádraig Lyons	Website	https://www.h2020-upstairs.eu/

Deliverable details			
Deliverable Number	4.7	Title	Digital Platform
Work Package	WP4: Creating UP-STAIRS digital tool to facilitate individual interactions and collective actions	Dissemination level	Public
Deliverable responsible	GCN	Contributing beneficiaries	All
Due Date (M)	01.09.2022 (M24)	Submission date	27.03.2023 (M31)

As part of Task 4.2 the UP-STAIRS Digital Platform was developed to enable collaboration between citizens, energy consultants (so called implementation champions) and other stakeholders of the participating pilot projects to support the growth of energy communities and collective action in energy efficiency measures.

The UP-STAIRS Digital Platform offers a variety of use cases to these different groups of stakeholders. These use cases are centered around retrieving information on EE/ RE projects, learning about collective action, assessing the effects of different collective actions, meeting and communicating with or between ICs and citizens.

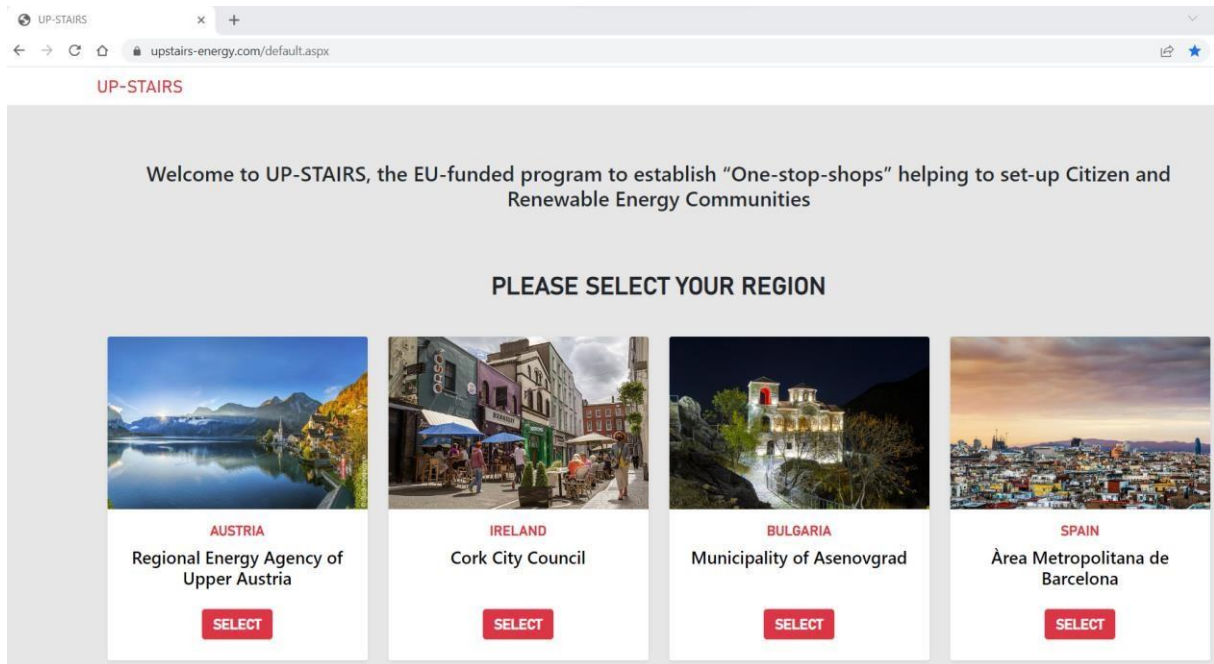

To enable both, the usage of the Digital Platform through web-browsers as well as through mobile devices and tablets, the Digital Platform was programmed in a responsive design. Responsive web design is an approach that allows design across various devices (mobile, desktop, tablet, etc.) and suggests design should respond to the user's behavior based on screen size, platform and orientation.

The Digital Platform can be reached in different ways. There is one general URL, which is <http://www.upstairs-energy.com> and then there are pilot specific URLs which are directly linked to the content from the respective pilot OSS's. The reason for having a general landing page is that in marketing materials and communication this shorter URL might be easier to use.

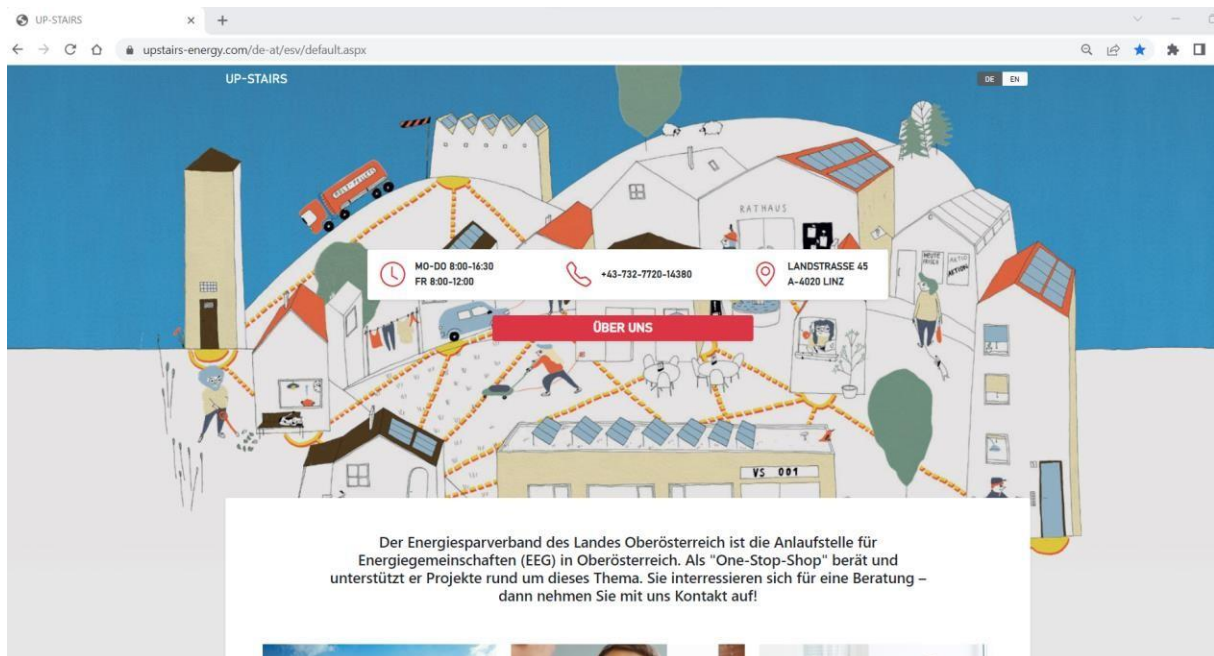

There are different parts on the platform. The first part, when citizens visit the platform, is the so called pre-registration part. Here the citizens can collect information, read about the OSS services, find E-Mail addresses and telephone numbers of the OSS and other information. This part can be visited without having a registration. The other part is the post-registration part. Buttons and links are inserted on the platform for citizens to enter the registration process. If a citizen clicks on such a button or link, he/she is taken to the registration process. After a successful registration the citizen is taken to the post-registration part. Here, the citizens are onboarded into so called project rooms. In these project rooms citizens and implementation champions shall work together on energy efficiency end energy community projects.

The pre- and post-registration parts are shown in the following screenshots:

Hello and welcome to our One-Stop-Shop! My name is Patrica Tobin and I am here to help you on the way to a more sustainable home!

PL Padraig Lyons (PL) 14/2/2023 14:16:51
Hi Patrica, I am very interested in forming an energy community. How do I go about it? I have another interested community member Lorena.
